

2008/2009 Guide to Hunting the Licensed Game Bird Clubs of California

INTRODUCTION

Licensed Game Bird Clubs (LGBC) are privately owned land areas where domestically reared game birds are released to provide additional hunting opportunities. There are currently two types of clubs and they are categorized as either a Zone A or Zone B club. LGBC are categorized in reference to their location within California.

ZONE A LGBC

All LGBC located within the shaded area of this map are designated Zone A clubs. The 2008/2009 pheasant season begins on October 18, 2008 and ends on February 8, 2009. For all other domestically reared game birds, hunting begins on September 1, 2008 and ends on March 31, 2009.

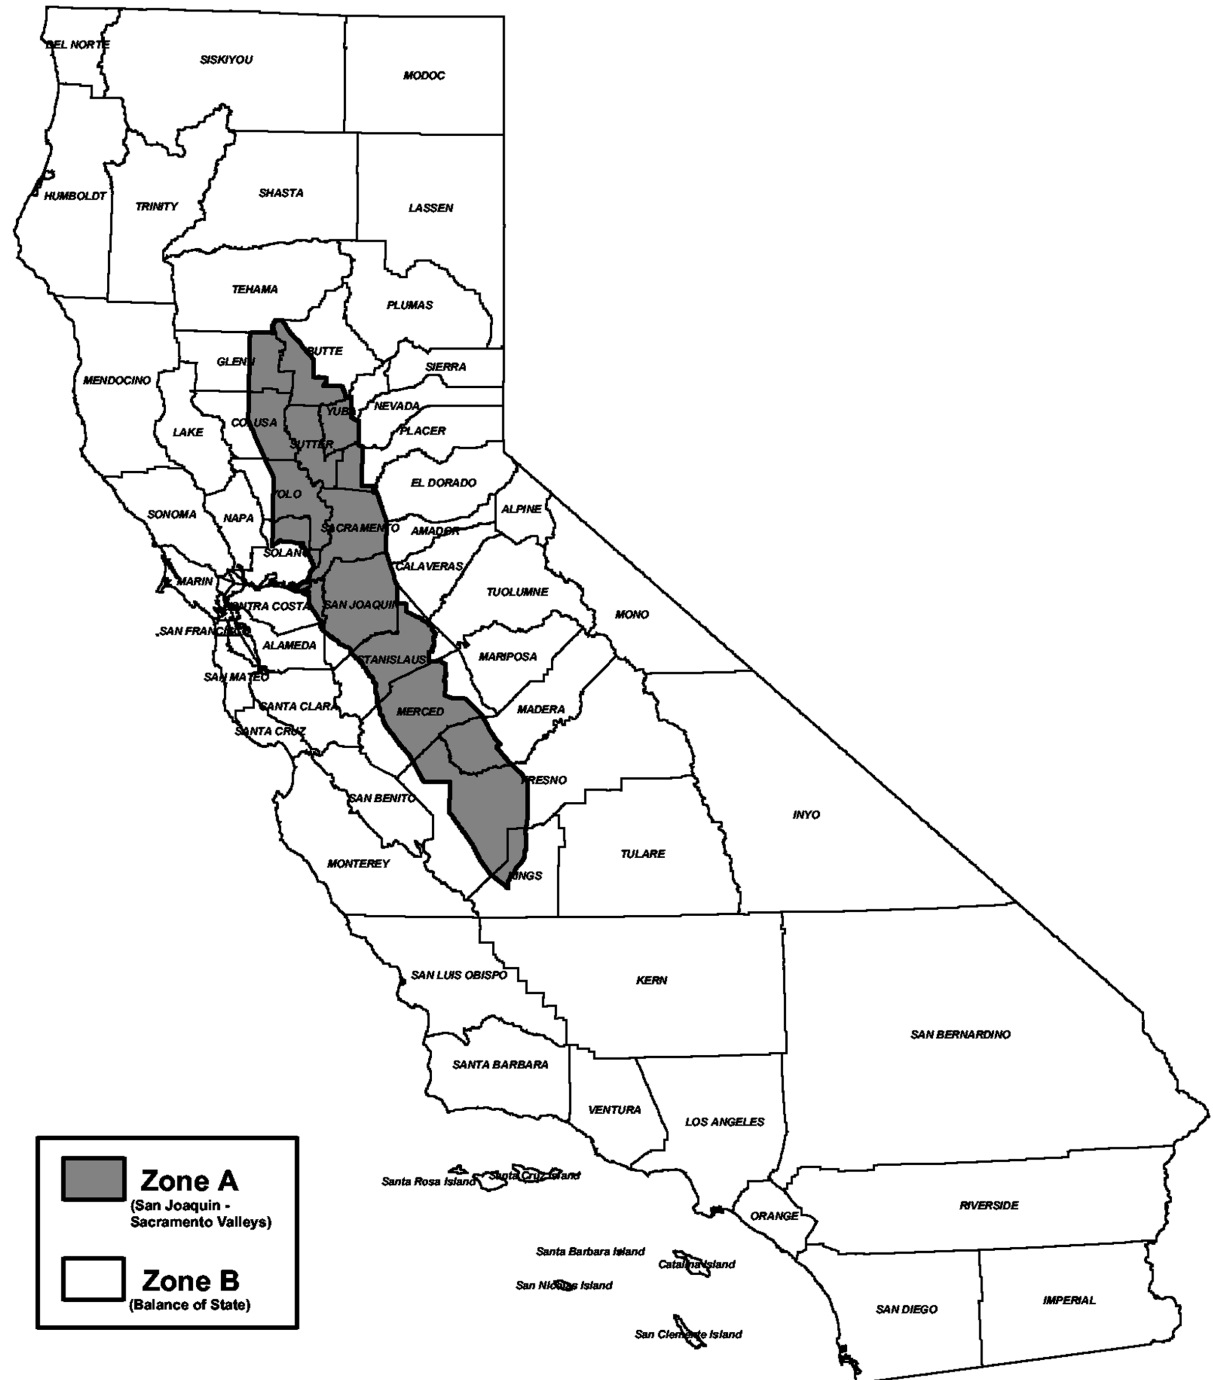

ZONE B LGBC

All LGBC in the balance of the state are designated Zone B clubs. Hunting for pheasants and all other domestically reared game birds on Zone B clubs begins on September 1, 2008 and ends on May 31, 2009.

BENEFITS OF HUNTING ON LGBC

- Hunt domestically reared upland game birds up to 9 months
- Have no bag limits
- Take either sex
- Hunt closer to home
- On select clubs, take released chukar, turkey, and bobwhite in addition to pheasant
- Opportunity to train your dog
- On select clubs, guiding and retrieving dog services provided
- Count on higher success rates

If you would like more information about hunting on LGBC, please contact one of the clubs or the California Department of Fish and Game at 1740 N. Market Blvd., Sacramento, California 95834, (916) 928-5849, SPU@dfg.ca.gov.
